

Columbia University's Program in Hellenic Studies
and
The Consulate General of Greece in New York

invite you to a talk by

Dr. Nikolas Kakkoufa
(Columbia University)

on

'A vision all its own of flesh'
Bodies in and beyond Cavafy's work

The talk traces how the process of identity building and uncovering of sexual selves registers on the homosexual body. What types of bodies are produced and constructed through Cavafy's poetry? Does Cavafy's work constitute a rupture in the model of queer writing about the body of the 19th and 20th century?
