

The Institute for Money, Technology, and Financial Inclusion invites you to:

Imagining (the Future of) Money

A public roundtable with

Max Haiven

Assistant Professor
Art History & Critical Studies
Nova Scotia College of Art & Design

&

Eduard de Jong

Payments expert and digital currency
pioneer

Moderated by Bill Maurer

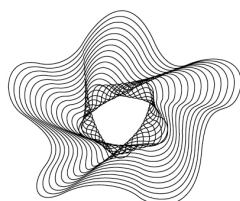

Wednesday, October 8, 2014

3-5pm

SBSG 3323

In the wake of the recent global finance crisis and in the midst of profound innovation in the ways people can move and store value—from Apple Pay to Bitcoin—what does the future of money hold? Rapid changes in mobile and digital technology, shifts in the regulatory landscape, and the articulation of diverse critiques of the financial system promise to transform the relationship between people and finance. These transformations also provoke questions about how we represent money and imagine alternatives; the importance of trust in the circulation financial flows; the role of government, corporations, and other institutions in mediating and authorizing financial transactions; and the impact of emerging payment and accounting technologies, including cryptocurrencies like Bitcoin.

Max Haiven and Eduard de Jong will join Bill Maurer, Dean of the School of Social Sciences, Professor of Anthropology, and Director of IMTFI to discuss these questions and more.
